Assignment 1

Robert Wooner

September 15 2017

What topic I chose and Why I chose This topic

My database is comprise of computer security information that was scraped from Wikipedia. I initially searched "computer security", but I ended up grabbing 13 subcategories that all purtain to computer security and it also grabbed 2095 pages that were provided by each of the 13 subcategories. The reason I chose to do computer security is because its something that I've been interested in for a long time and as it turns out, I really don't know too much about it.

Categories in database and number of pages in each

- Computer network security
  - 282 pages
- Computer security
  - 291 pages
- Computer security exploits
  - 141 pages
- Crime prevention
  - 101 pages
- Cryptography
  - 250 pages
- Cybercrime
  - 131 pages
- Cyberwarfare
  - 124 pages

  2095 Total pages

- E-commerce
  - 469 pages
- Information governance
  - 17 pages
- National security
  - 91 pages
- Secure communication
  - 73 pages
- Security technology
  - 68 pages
- Weapons countermeasures
  - 56 pages

What my plans for the database are

My plans for my computer security database is to be able to access the topics that I don't really know about within the subject of computer security at any given time. It would be nice to have one place to go when you come accross an attack or method that you have never heard about.
